

3 Months Certified Course on “Introduction to Cyber Laws”

by

World Cyber Security Forum

Course Outline

Our physical world is rapidly converting itself into a digital world because for every other small thing we are completely dependent on the E-World or Internet World.

“Cyber” is a term which denotes the interlinking with Information Technology i.e. Computers. The need of coming up with this short-term course is to encourage & simplify the learning of the techies as well as the new comers who are tremendously curious about knowing Cyber Laws & its related aspects.

This course is specifically designed for those individuals who are extremely enthusiastic & willingly to learn about the cyber trends as the cyber lawyers & techies are in high demand & there are very few organizations who follow the practical approach towards learning this subject. These are other benefits as well in order to opt out for this course. Some of them are:

- Cyber Laws or Tech Laws are an emerging field & according to a survey this industry is growing which is demanding a large number of experts & techies.
- This course is a perfect stop shop for beginners who are really excited about the cyber world & want to enter in it.
- It is also ideal for B.E/B.Tech/Computer Sc/IT background students who have achieved their knowledge in cyber security but shall also learn the basics of cyber laws.
- This course will not just open the doors of new learning but also enhance the career growth.
- Talking about the practical approach, this course is designed by experienced hands which tends to complete the ultimate goal of making every candidate attach to it so that it will be easy to understand & learn. Also, some real life cases & examples will act as a cherry on the cake.

- Many big companies & corporations are recruiting those legal personas who have vast & deep knowledge of Cyber Laws & this course will act as a lifeguard to the candidate in a very small time where the person will at least be able to earn & learn at the same time.
